

# **New Open Data Portal in Ghent**

Submitted on 28 Sep 2012 by

As of today (sep 28 2012) the new version of the Ghent DataPortal is online (<http://data.gent.be>).

It's a drupal development, built by Digipolis.

The main features are provided by The Datatank (<http://thedatatank.com>), which allows for easy conversion of dataformats.

All feedback is welcome.
