

URL <https://www.nologin.es/es/>**Quick facts**

 Company:	Nologin
 Sector:	Science & Technology
 Product / service:	Company
 Type of data:	Public data
 Origin:	Spain

**Description**

Nologin Consulting is a company that collaborates with other businesses around the world to store, manage, organize, protect and maintain their client's information. It specializes in Cloud, Cybersecurity, Identity and Datacenter projects.

Benefits

Nologin accompanies its clients in their digital transformation with a complete value proposition: from consulting to managed services, including the development and deployment of innovative structural solutions.

**How open data is used**

Nologin uses data made publicly available by the administrations and organisations that the company serves. It uses Copernicus Marine data to create the Environmental Control Panel application, a mobile application to improve management, monitoring and forecasting in Spanish ports.
