Quick facts

- Company: NitricWare
- Sector: Health
- Product / service: Application
- Type of data: Geolocation & ambulance data
- Origin: Austria

Description

The application provides information on public defibrillators including their accessibility in Vienna. Users see the nearest defibrillator to their position on a map. Also, users see additional useful tips for reanimation. The application also provides an in-app option for an emergency call to the Austrian ambulance. Lastly, information on first aid courses is displayed in the application.

Benefits

- This application empowers people to act fast in an emergency and thereby, ultimately save lives.
- The in-app opportunity for an emergency call enables people unaware or unfamiliar to local emergency phone numbers to get rapid professional help.

How open data is used

- Shock re-uses open data from the city of Vienna regarding defibrillators and integrates them in one map.
- The application also uses public data on useful reanimation tips and first aid courses from providers such as Samariterbund, Johanniter, Malteser, and Red Cross.
