Quick facts

- Company: National Community of Belgian Railways
- Sector: Transport
- Product / service: Application
- Type of data: Real-time railway data of the National Community of Belgian Railways
- Origin: Belgium

Benefits

- Provides a route planner, timetables and social network for people travelling by train in Belgium.
- Provides real-time information on the application and through social networks by using hashtags such as #SNCB and #NMBS.
- Application includes a chat room that allows users to communicate with other Android users in the train.

How Open Data is used

- Open Data from the NMBS provides railroad information to train travellers, such as traffic disturbances at the moment of their travels and which station is closest to location of the user.

Future Plans

- Continue providing real-time updates on route planner and train timetables.
