 Company:	Brussels Regional Informatics Centre
 Sector:	Regions & Cities
 Product / service:	Platform
 Type of data:	Public data
 Origin:	Belgium

**Description**

datastore.brussels is the regional platform for publishing open data and sharing data and services in the Brussels region. This platform is designed for data producers and users, and facilitates and promotes the re-use of data and services. Users of datastore.brussels are free to browse the portal, search, and consult the various data and web services.

Benefits

The platform offers individuals, companies, administrations, start-ups, schools, and universities, free and open access to the data of the Brussels region.

datastore.brussels
