 Company:	Euromaps
 Sector:	Population & society
 Product / service:	Website
 Type of data:	Diverse European Statistics
 Origin:	Belgium

**Description**

Euromaps visualises life updates about a variety of sectors, such as societal, economic, and financial issues.

**Benefits**

-  Wide access – A broad portfolio of topics are visualised on the website.
-  Accessibility – The website turns complex datasets into maps that can be easily understood and shared, helping to separate facts from pure fiction. For example, the gas emissions in tonnes per person between 1990 and 2016 or the youth unemployment in the EU between 2002 and 2017.

**How open data is used**

Euromaps turns diverse data (e.g., economy & finance, population & social conditions, international trade, agriculture & fisheries) coming from the European Statistical System into easy understandable visualisations.
