 Company:	Midttrafik
 Sector:	Transport
 Product / service:	Application
 Type of data:	Traffic data
 Origin:	Denmark

**Description**

Midttrafik live is an application developed by the national transport company Midttrafik that provides traffic information across Denmark. The application enables users to find information for their travel itinerary and promotes the use of public transport services as a more sustainable alternative to driving a car.

**Benefits**

The applications allows users to track the real-time location of buses, search for buses and stops, receive reminders when the bus or light rail approaches your stop, find expected departure times and traffic info, save itineraries and stops as favourites, and check available spots on a bus.

**How open data is used**

Midttrafik live uses data published by the bus companies that run the local and regional routes in the Central Jutland Region.
