## Quick facts

-  Company: Estonian Fiscal Council
-  Sector: Economy & Finance
-  Product / service: Visualisation
-  Type of data: Economic data
-  Origin: Estonia

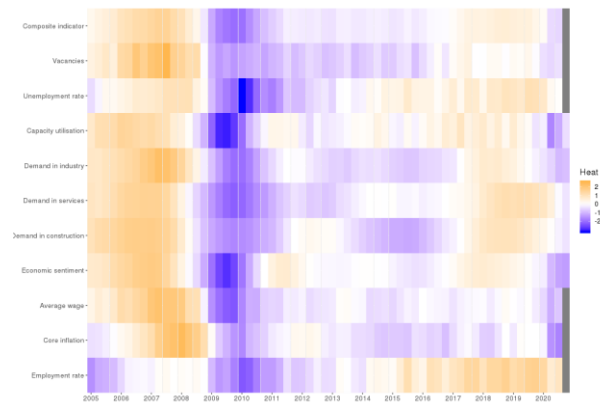

## Description

The Estonian Heatmap shows an overview of various economic and financial trends in terms of average wage, capacity utilisation, core inflation, economic sentiment, employment rate, unemployment rate, vacancies and demand limiting in construction, industry, or services. The map and the source data presents statistics from 2005 onwards.

## Benefits

In one clear and simple overview, users can monitor a number of statistics and gauge the rate of their change by simply observing a change in colour. This makes it an easy-to-use an intuitive way to understand financial trends over the years.

## How open data is used

The Estonian Heatmap obtains real-time data from Eurostat and the Statistic Estonia database, both of which are public, open data sources.
