Quick facts

-  Company: Alim'confiance
-  Sector: Health
-  Product / service: Application
-  Type of data: Geodata, Open Data of sanitation inspections, coordinates of geotagged images
-  Origin: France 

Benefits

-  The application provides information on sanitation level of different locations. There are four levels of hygiene (Excellent, Satisfactory, Needs Improvement and Needs Urgent Attention) extracted from sanitation inspection reports. 

How Open Data is used

-  Open Data is used to create a map with different location points, such as bakeries and restaurants and states if that location has good sanitation or not, based on the sanitation inspection report. 

Future Plans

-  Continue to provide up-to-date information on sanitation level of different locations.
