Saemes
Platform

URL	https://opendata.saemes.fr/page/home/

Quick facts

- Company: Saemes
- Sector: Transport
- Product / service: Platform
- Type of data: Parking data
- Origin: France

Benefits

- Saemes provides real-time parking information in Paris to allow drivers to save time and find their parking space swiftly

How Open Data is used

- Saemes acquires and integrates real-time parking data of parking garages and car parks in Paris. Besides showing which parking spaces are available, the platform also navigates its users towards these parking spaces.

Description

- Identifies available spaces in parking garages in Paris for people searching for one
