

URL <https://adresse.data.gouv.fr/>

Quick facts

- Company: Data.gouv.fr
- Sector: Regions & Cities
- Product / service: Website
- Type of data: Data on addresses in France
- Origin: France

Description

The National Address Base provides data on each address listed in the French territory. This data can freely be used and is intended to support emergency services, people who carry out a cartographic analysis, and public and private operators. The data is updated on a weekly basis.

Benefits

- With the National Address Base, emergency services can arrive faster at the right place.
- Private and public operators can better coordinate their projects in terms of locational aspects, such as mailing lists.
- Cartographic analyses can be carried out in a few clicks.

adresse.data.gouv.fr

How open data is used

The National Address Base is run by the official French open data portal and was built from addresses databases of La Poste, the National Geographic and Forest Information Institute (IGN) and the Public Finances General Directorate (DGFiP). It was then enriched by data produced by governmental agencies, and will be fueled continuously by citizen contributions.
