

URL <https://www.aipark.io/>**Quick facts**

-  Company: AIPARK
-  Sector: Transport
-  Product / service: Application
-  Type of data: Real-time traffic data
-  Origin: Germany

**Description**

AIPARK provides live parking assistance based on data from millions of connected vehicles. The system integrates with all internet-enabled platforms: connected cars, mobility apps and traffic management.

Benefits

-  Clear overview – List of managed parking facilities with opening hours, prices, predicted and live availability.
-  Automatic – AIPARK's assistant automatically select the best available parking options and optimises last mile navigation.

**How open data is used**

The system analyses real-time traffic data to calculate the probability of finding an open parking spot for every street segment, garage, underground parking etc.
