Quick facts

- Company: Trinkwasser
- Sector: Environment
- Product / service: Website
- Type of data: Municipal data
- Origin: Germany

Benefits

- Information on tap water is made understandable for the consumer.
- Using Trinkwasser consumers are able to compare the quality of their tap water between different neighbourhoods and mineral water.

How open data is used

- Municipal reports are gathered and have to be made machine readable. Where documents were incomplete, the data was requested by Trinkwasser.
- Open data is currently gathered manually and has to be updated with the data of different formats published by the municipalities.

Description

- Trinkwasser shares information regarding tap water in Germany because tap water within Germany can differ in composition depending on the region. Trinkwasser consolidates all the municipal data on water quality and makes it understandable for the consumer.
