## Quick facts

- Company: Bertelsmann Stiftung
- Sector: Population & Society
- Product / service: Application and Platform
- Type of data: Open German statistical data
- Origin: Germany

## Description

With Wegweiser Demographie, users can discover population development in Germany. Users can choose the municipality they are interested in and use the application to visualise the development of inhabitants until 2030. Examples of available data are birth rates, its forecast, or the population development according to different age groups.

## Benefits

- The application and platform presents and educates users on the population development of a municipality through visualisation.
- Wegweiser Demographie empowers people to have informed discussions about population development in Germany.

## How open data is used

- Wegweiser Demographie uses German national statistical data such as As-Is-data (2006 - 2016) on education, demographic changes, finance, sustainability/SDGs, economy & work, and migration.
- They also use forecast data (until 2030) on population projection and nursing forecast of all German municipalities with more than 5,000 inhabitants.
