Quick facts

-  Company: World Health Organisation
-  Sector: Health
-  Product / service: Website
-  Type of data: Online COVID-19 news articles
-  Origin: Global

Description

The COVID-19 News Map displays the headlines and snippets of the ten most recent articles that the 'Epidemic Intelligence from Open Sources' (EIOS) system has identified as being related to COVID-19 in their original languages.

Benefits

-  The EIOS' initiatives bring together new and existing initiatives, networks and systems to create a unified platform.
-  This dashboard centralises the abundance of news globally available on the pandemic.

Coronavirus

Ekonomika Lietuvos: cifros ir faktai

Wednesday, July 29, 2020 14:59

Показатель потребительского доверия (ПТД) в июле повысился в Литве по сравнению с июнем на три пункта, сообщил Департамент статистики. Жители в июле лучше оценивали перспективы экономической ситуации страны и домашнего хозяйства, хуже - изменения финансовой ситуации домохозяйства.

Geolocation: Литва
