#### Quick facts

 Company:	OSMS
 Sector:	Health
 Product / service:	Website
 Type of data:	Health data
 Origin:	Global

#### Description

Open Source Medical Supplies is a website that helps local communities manufacture and distribute medical supplies in response to the COVID-19 pandemic. The website offers collaborative environments, detailed information and strategic support for manufacturers, engineers and institutions. These services make quick and effective production and mobilisation of resources across the globe possible to combat the crisis.

#### Benefits

OSMS offers expertise across various domains and includes engineering, medical, science, research, manufacturing, design and software development. Their team covers five different time zones and is built from a large global, knowledgeable community.

#### How open data is used

OSMS's work is distributed under a Creative Commons Attribution-ShareAlike 4.0 International License. This allows users to share and adapt the information provided by OSMS, meaning that data can be copied or redistributed through any type of medium or format, can be transformed, or can be extended for any purpose.
