Agroknow
Website

URL	https://www.agroknow.com/

Quick facts

- Company: Agroknow
- Sector: Agriculture, Fisheries, Forestry & Food
- Product / service: Website
- Type of data: Data on agriculture research
- Origin: Greece

Description

Agroknow focuses on knowledge management and research on knowledge-intensive technology innovations for agriculture, food, and biodiversity. Organisations and people can get support on how to address societal and environmental challenges using solutions that are informed and enhanced by high-quality data, as Agroknow has an extensive experience in building services for the agricultural community.

Benefits

- Organisations and people can access the knowledge and technological innovations and do not have to invest in research themselves.
- Technology innovations solving societal and environmental challenges are fostered and shared.

How open data is used

- Agroknow is hosting the Data Processing Unit of the traditional AGRIS service – a global information system collecting and making accessible bibliography on agricultural science and technology.
- They are directly involved in EU-funded projects related to the management of agricultural information and are in collaboration with leaders in agricultural research.
