Quick facts

 Company:	Ola cabs
 Sector:	Transport
 Product / service:	Website & Application
 Type of data:	Geodata
 Origin:	India

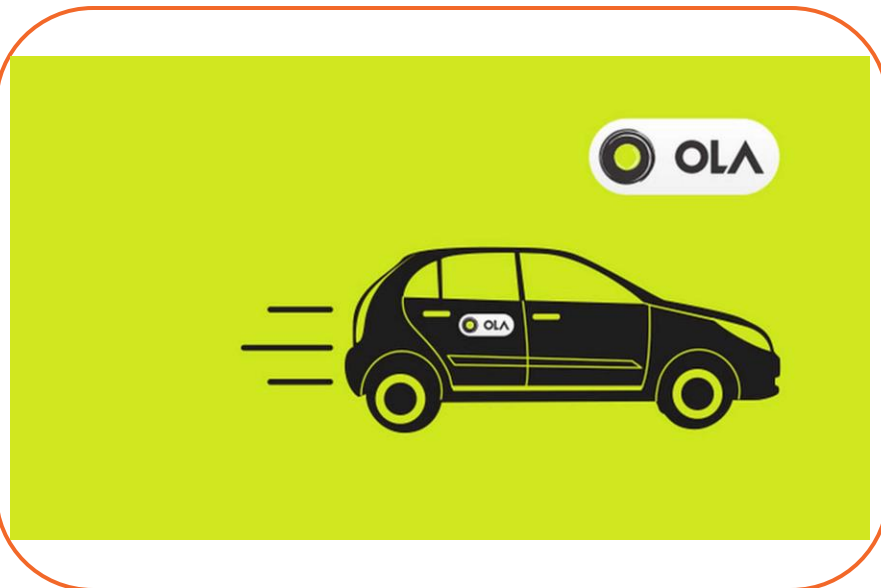

Description

Ola cabs was founded in India and is mainly known for its transportation services, offering city taxis (incl. ridesharing) and rental cars. Ola cabs operates in India, Australia and the United Kingdom. In terms of transportation, the company offers services for both private and corporate use and different types of vehicles (ranging from different sizes of cars and scooters). The service provides both pay per ride and membership options.

Benefits

- Ola cabs always checks whether drivers have a valid driver's license and takes decisive action whenever a passenger feels unsafe.
- Ridesharing can reduce traffic congestion and pollution.

How open data is used

Geo open data is used to connect people with available vehicles for a pay per ride or rent basis through the application. Geodata offers maps of the surrounding and widely used transportation routes in cities in India, Australia and the United Kingdom. In this manner, Ola can make sure their vehicles are available in all highly used transportation routes.
