Quick facts

-  Company: National Transport Authority
-  Sector: Transport
-  Product / service: Application
-  Type of data: Public transportation, geodata
-  Origin: Ireland

Benefits

-  Real-time information on train, bus and tram services throughout Ireland including a journey planner and timetables
-  The application provides a taxi fare estimation tool, cycling and walking route planner and information about the Leap Card.

How Open Data is used

-  The application is based on Open Data about various modes of public transportation in Ireland, such as travel by bus or by train. This data is used to aid users in planning their trip. Moreover, it takes Open Data regarding walking and cycling routes in Ireland and uses this data to propose journeys to its users.

DOWNLOAD REAL TIME APP

Get real time arrivals information on train, bus, and tram services throughout Ireland.

The Real Time Ireland App integrates all real time arrival information services from Dublin Bus, Bus Éireann, DART, Iarnród Éireann and Luas services.

You can download the Real Time Ireland app free from the [Apple App store](#) for iPhone and iPad, or [Google Play store](#) for Android devices or [Windows Phone Store](#) for Windows devices.

Description

-  An application providing real-time information about public transportation in Ireland
