URL	https://somo.com/#home

Quick facts

- Company: HERE Mobility
- Sector: Transport
- Product / service: Application
- Type of data: Mobility data
- Origin: Israel

Benefits

- SoMo is an application that helps users compare prices and rides in their area in a single application instead of jumping between services.
- The application provides a platform for users to schedule and plan a carpool meetup or to book a taxi or private car.

How open data is used

- HERE Mobility collects data from different transportation services about buses and trains real-time location, the available cars for rent and nearby taxis to a users location. SoMo application shows this information in an interactive map.

Description

- SoMo is a ride planning and sharing application that is part of HERE Mobility. The application aims to help people compare prices of rides in their areas and to provide a platform that makes it easier for users to schedule a carpool meetup.
