Quick facts

- Company: Eloisa Technologies
- Sector: Economy & Finance
- Product / service: Website & Application
- Type of data: Economic data
- Origin: Italy

Description

Eloisa Smart City Assistant is the conversational agent that knows everything about your city and is available to talk with the residents 24/7. A single employee can train Eloisa to work as a customer service, tour guide, problem solver, to name a few. For example, Eloisa can tell you how much a coffee costs in Milan.

Benefits

- Eloisa can reduce costs for governments by providing a digital assistant.
- The digital assistant helps to make people more comfortable dealing with technology.

How open data is used

Eloisa Smart City Assistant allows users access to any data-base in vocal form, seamless with the conversation. The databases that are used are very diverse and range from (mostly) economic data to geodata.
