## Quick facts

- Company: Check
- Sector: Transport
- Product / service: Website & Application
- Type of data: Geodata and transport data
- Origin: The Netherlands

## Description

Check is a transportation company founded by a Dutch family business. Check rents e-scooters through the use of an application. The "Check connect API" provides mobility providers the opportunity to add Check to their mobility portfolio. Therefore, the services of Check are also visible on other platforms. The APIs offer Mobility as a Service (MaaS). They are developed accoring to guidelines of the Dutch Ministry of Infrastructure and Waterworks.

## Benefits

- The use of e-transportation potentially reduces the pollution in cities.
- E-scooters reduce the traffic congestion from cars.
- The e-scooters can be used on existing infrastructure in the cities.
- The e-scooters are relatively affordable for young people.

## How open data is used

Geo and transportation open data is used to connect people with available e-scooters through the application. Geo open data offers maps of the surrounding and widely used transportation routes in the city. In this manner, Check can make sure their e-scooters are available in all highly used transportation routes.
