Quick facts

 Company:	Share 'n go
 Sector:	Transport
 Product / service:	Website & Application
 Type of data:	Geodata
 Origin:	The Netherlands

Description

Share 'n go is an electric car sharing service dedicated to reducing environmental pollution. The cars are rented by users through an application. The vehicles can be used in the newly established environmental zones in Rotterdam, Amsterdam, Utrecht and the Hague. The cars can be rented for the price of 0.28 eurocents per minute and 50 euros for a day. Girls can buy a monthly ticket to drive home safely during the night.

Benefits

- Share 'n go is relatively affordable for people who do not yet own a car or do not have the financial resources to buy a car.
- Share 'n go is environmentally-friendly and the cars take little space in crowded city centres.

How open data is used

Geo open data is used to connect people with available cars through the application. Geodata offers maps of the surrounding area and widely used transportation routes in the city. In this manner, share 'n go can make sure cars are available in all highly used transportation routes.
