## Quick facts

- Company: Dutch governmental initiative
- Sector: Justice, Legal System & Public Safety
- Product / service: Website
- Type of data: Dutch municipal data & geolocation
- Origin: The Netherlands

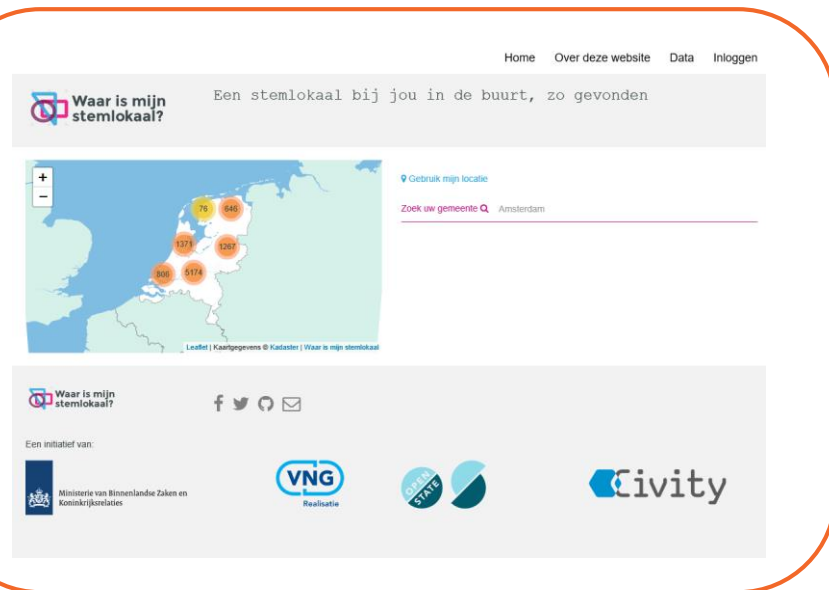

## Description

This website supports users to find their polling station in the Netherlands. Users can search for the closest polling station to their location, to a postal code, or by zooming in on a map for a specific polling station. If they click on a polling station, users see additional information such as the name, address, opening hours, and wheelchair accessibility of the station.

## Benefits

- The website helps voters find the nearest polling station to their location or postal code in a fast and user-friendly manner.
- Users have information regarding all polling stations for elections, including name, address, and opening hours.

## How open data is used

Open municipal data and geolocation data come from the 358 municipalities across the Netherlands and are integrated into one map.
