Quick facts

- Developer: Michał Tajchert
- Sector: Environment / Health
- Product / service: Application
- Type of data: Air pollution data
- Origin: Poland

Benefits

- Provides transparency about current air quality and smog in Poland.
- Protects especially those with a respiratory disease.
- Offers an easy way to compare air quality throughout Poland.

How Open Data is used

- Kanarek combines Open Data and proprietary data. It uses Open Data from 160 air quality stations of the Polish Environment Agency (CIEP), as well as data from 393 additional stations from commercial providers to show levels of CO₂, NO₂ and others.
- Besides a live map view, it also warns the user when the local air quality drops to a severe level.

Future plans

- Kanarek is still in active development. The developer welcomes suggestions for new features.
