Fogos
Platform

URL **https://fogos.pt/**

Quick facts

- Company: Fogos
- Sector: Justice, Legal System & Public Safety
- Product / service: Platform
- Type of data: Open data from national civil protection
- Origin: Portugal

Description

Fogos maps fires in Portugal on a map. On this map, users can see the intensity of a fire, a twitter feed about this fire, weather data of the affected area, a timeline of the fire outbreak, as well as dates about the scope of the deployment of the fire brigade (number of people and fire-fighting vehicles). Data is derived from the Portuguese Civil Protection.

Benefits

- Fogos provides users a real-time overview of current fires and adds relevant information about this fire allowing the citizens to take preventive measures or actions.
- The platform adds to national risk prevention and contributes to the management of the forest fire risks.

FOGOS.pt

How open data is used

- Fogos brings together open data from the Portuguese Civil Protection and visualizes them in a user-friendly way by showing a map. Furthermore, it combines weather data, open national civil protection data, geospatial data, and public data such as Twitter feeds.
