## Quick facts

-  Company: iGeo
-  Sector: Environment
-  Product / service: Application
-  Type of data: Biological and geographical data
-  Origin: Portugal

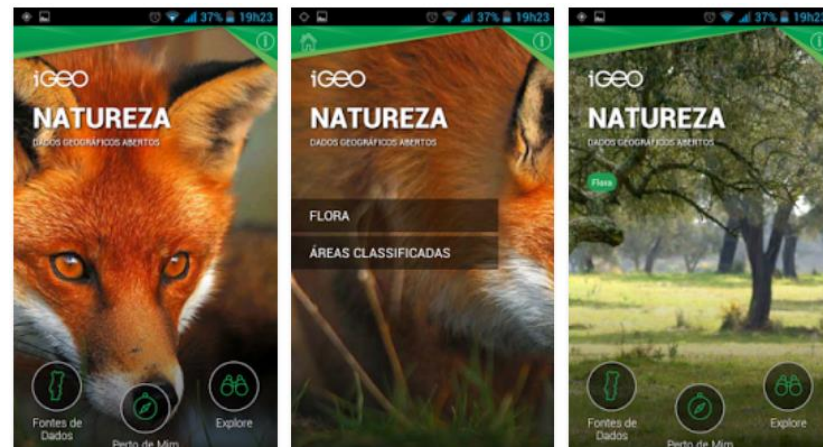

## Benefits

-  Users can discover and look up flora and fauna in Portugal while they are on the move.

## How Open Data is used

-  The app uses data from the Portuguese Environment Agency and the Institute for Conservation of Nature and Forestry to give information on local flora and fauna.

## Future plans

-  The app was constructed as an inspirational idea to showcase what was possible using Open Data. This app itself will not be further developed, but people are encouraged to use Open Data sources to create other similar apps.
