Quick facts

- Company: Grabtaxi
- Sector: Transport
- Product / service: Application
- Type of data: Transport data
- Origin: Singapore

Benefits

- Grabtaxi offers users various services from ride sharing, ordering a taxi, privately owned car, couch or shuttle, renting a car and food delivery.

How open data is used

- Grabtaxi gathers data about the location of their users – ranging from clients who want to go somewhere or have something delivered to drivers of taxis, privately owned cars, shuttle buses and couches. The service connects users through a platform and informs drivers of the location of the client and the client of the distance of the driver.

GRABTAXI

Description

- Grabtaxi is a technology company that offers users ride-hailing, ride sharing, food delivery and logistics services through its application. The company originated in Singapore, spread throughout South-East Asia and is now entering the United States.
