Quick facts

- Company: ISETIC
- Sector: Agriculture, Fisheries, Forestry & Foods
- Product / service: Company
- Type of data: National open data portals
- Origin: Spain

Benefits

- ISETIC is a fully managed service with the ability to monitor and analyse large volumes of data in real-time.
- The platform is easy to install, fully scalable and adaptable to clients' needs.

How open data is used

- ISETIC's Zeus platform collects and analyses business information in real-time, such as the processes, machines, products or other types of devices. With the platform, users are able to know the status of the organisation at any time. In addition, solutions also integrate open data from sources, such as Aemet, Euskalmet, Omie and Omip, to facilitate decision-making.

ISETIC

Description

- ISETIC's main product is the Zeus Platform – a solution that is based on advance technologies to manage all the elements that intervene in any productive process. This platform is a tool for experts to design and develop digitalised solutions and business processes to control the management of large volumes of data in real-time and to control the production processes for industry 4.0.
