Quick facts

- Company: Spanish tax authorities
- Sector: Justice, Legal System & Public Safety
- Product / service: Application
- Type of data: Auction data
- Origin: Spain

Benefits

- Citizens can easily and quickly check whether there are any auctions taking place that might interest them. They can gain detailed information before an auction.

How Open Data is used

- Using this app, citizens inform themselves on what auctions for assets seized or mortgaged by tax authorities are taking place. The app displays all information online regarding the asset and auction format in advance of an auction.

Future plans

- Addition online bidding features would further strengthen the application.
