### Quick facts

-  Company: Flitsmeister
-  Sector: Transport
-  Product / service: Application
-  Type of data: Traffic data
-  Origin: The Netherlands

### Benefits

-  The application provides drivers with traffic information so that they can avoid traffic jams.
-  Drivers are given updates if they are approaching speed cameras on their route.

### How open data is used

-  Flitsmeister consolidates its traffic information from governmental sources, traffic cameras and user generated content.
-  The user community of Flitsmeister is also a source regarding traffic information and speed cameras.

### Description

-  Flitsmeister is an app that helps drivers to avoid fines, traffic jams and road blocks. Flitsmeister does this by providing real-time traffic information from open sources and it's users. Next to the application the company also shares this information via several radio channels.
