

URL <https://www.homeshow.eu/>

### Quick facts

 Company:	HomeShow
 Sector:	Regions & Cities
 Product / service:	Website & Application
 Type of data:	National, map and neighbourhood data
 Origin:	The Netherlands

### Benefits

-  For homebuyers, the HomeShow websites give clear information regarding facilities in the neighbourhood as well as statistics regarding the population.
  -  HomeShow relieves real estate agents of finding the relevant data.
- 

### How open data is used

-  Map data is used to find shops and facilities in the neighbourhood.
  -  Land register data is used to report the feasibility of solar panels on the house.
  -  National statistics are used to find information regarding the population.
- 

### Description

-  HomeShow is a website that real estate agents can use to sell property. The website and application uses open data to automatically create a website for a home that is for sale and adds relevant information about the neighbourhood, such as shops, facilities and population statistics.
