

URL www.homematrix.eu

Quick facts

- Company: Consumatrix
- Sector: Economy & Finance
- Product / service: Website
- Type of data: Dutch cadastre data
- Origin: The Netherlands

Benefits

- The website provides exact house value calculations through an accurate house price model.
- There is reduced risk in the overvaluation of real estate.

How Open Data is used

- Provides valuable business information and actionable consumer insights.
- Supports the creation of algorithms and price indexes for a more accurate house price model.
- Open Data is combined with other property data from specific websites and other local and national governments for more information.

Future Plans

- Homematrix will continue gathering information to provide exact calculations and accurate house price models on the website.
