Quick facts

- Company: Hooikoortsradar
- Sector: Environment
- Product / service: Website/Application
- Type of data: Weather data
- Origin: The Netherlands

Benefits

- People suffering from hay fever can see the expected amount of pollen expected in the upcoming days.
- Hooikoortsradar provides daily information regarding pollen, pollen plants and hay fever.

How Open Data is used

- Hooikoortsradar works with data acquired from the Royal Netherlands Meteorological Institute (KNMI). The KNMI's primary tasks are weather forecasting and monitoring and the institution makes its data publicly available. Therefore, Hooikoortsradar can acquire the information it needs to build a website that provides information regarding pollen and hay fever.

Actuele verwachting
ma 09:00
