Quick facts

-  Company: Nederlandse Spoorwegen (NS)
-  Sector: Transport
-  Product / service: Website & Application
-  Type of data: Transport data
-  Origin: The Netherlands

Benefits

-  NS is a comprehensive service provider that makes a customer's journey accessible and efficient by giving users the opportunity to choose 'smart' travel options based on the most recent and available information.

How open data is used

-  NS gathers data from all the stations in the Netherlands, including disruption and engineering work, prices and the planned and current timetables of train transport within the Netherlands and neighbouring countries such as Belgium, France and Germany.

Description

-  The NS aims to enable people to move around the Netherlands quickly and safely by providing users with the most recent information available on transport in the Netherlands and several neighbouring European countries.
