Rijden de treinen
Application

Re-use

URL	https://www.rijdendetreinen.nl

Quick facts

- Company: Rijden de treinen
- Sector: Transport
- Product / service: Application
- Type of data: Open Data about shortages in the Dutch train network
- Origin: The Netherlands

Benefits

- Provides real-time data about the Dutch train network, such as severe delays or trains being cancelled.
- This application can help train commuters submit a claim for reimbursement under certain circumstances.
- Informs users of the application about upcoming restorations on the tracks and the affected stops.

Future Plans

- Continue to provide real-time information on the Dutch train network.

How Open Data is used

- Open Data on Dutch trains, the amount of people in a train and the train schedules are used for real-time information.
