Quick facts

- Company: Illustreets
- Sector: Housing, construction, real estate
- Product / service: Website (visualisation tool)
- Type of data: Open government data
- Origin: The United Kingdom

Benefits

- Illustreet is a web-application that is useful to those looking to buy or rent property anywhere in the United Kingdom. It puts deprivation, crime, education, transport, environment and census data on an interactive, searchable map.

How Open Data is used

- Illustreets extracts value from Open Data, such as geodata and
- governmental data about crime rates and deprivation. It takes raw numbers and uses them to build an interactive map and reports for commercial sale, web-applications or internal use.

Description

- A web-application providing information about neighbourhoods for house hunters
