

URL <http://www.openbudget.in.ua/?locale=en>

## Quick facts

-  Company: Open Budget
-  Sector: Government & Public
-  Product / service: Website
-  Type of data: Political, budget
-  Origin: Ukraine

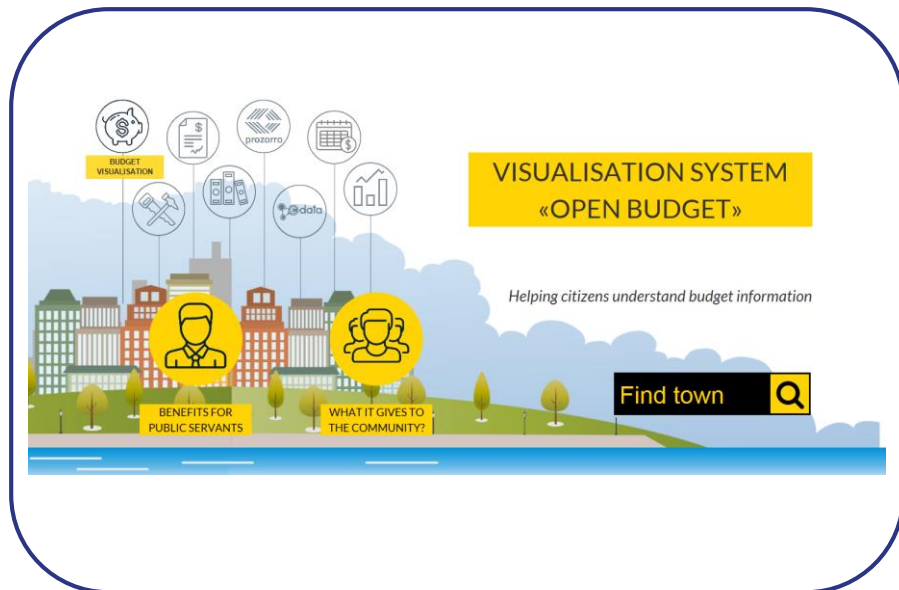

## Benefits

-  Open Budget helps citizens to understand budget information through visualisations.
-  The website raises public awareness and improves political consciousness.

## How Open Data is used

-  Data is acquired from the Ukrainian Open Data portal. The data is used to create visualisations for three types of subjects: city budget, repairing map (showing current repairs and constructions) and city programs. Hence, the visualisations offer insights into complex government operations and makes them easier to understand for the public.

## Description

-  A tool that helps local municipalities publish and present budget information in a user-friendly way
