 Origin:	Ukraine

ШТРАФИ UA

Description

Shtrafy UA, literally meaning “Fines UA”, is an Odesa-based start-up that has launched a mobile application service that lets users check the status of their traffic tickets and pays them. This start-up was established during the Open Data Challenge hosted in Ukraine and already has close to a million downloads.

Benefits

Some motorists have been forced to pay the same traffic ticket several times due to procedural errors. These mistakes can be prevented using this app.

**How open data is used**

In 2020, following the cooperation with the Ministry of Internal Affairs on sharing the data of the Register of Registered Road Traffic Violations, supplemented the service with functionality that enables users to receive information about a traffic ticket and monitor its payment in the police database.
