|  Company: | LACMA |
|  Sector: | Education, Culture & Sport |
|  Product / service: | Application |
|  Type of data: | Geospatial and cultural data |
|  Origin: | United States |

Description

The LACMA application is designed for the Los Angeles County Museum of Art and enables users to locate artworks, plan their trip and help visitors navigate around the museum's campus.

Benefits

The LACMA application make it possible for users to:

- Browse and filter the collection of works, exhibitions and calendars;
- Plan their visit around current expositions and special events;
- Receive detailed, contextual information on the art piece on display; and
- Get behind-the-scenes views with audio and video comments from experts and artists themselves.

LACMA

How open data is used

Through an online database, information on art pieces is made available in the form of images. Through partnering with Google Arts & Culture, LACMA offers a platform where information and images can be shared between employees, visitors and other museums worldwide.
