<https://www.doorda.com/>**Quick facts**

-  Company: Doorda
-  Sector: Government & Public
-  Product / service: Company
-  Type of data: National and local data
-  Origin: United Kingdom

**Benefits**

-  Doorda consolidates and standardises thousands of datasets into one self-service Cloud Platform, allowing partners and consumers to focus on analysis and insight instead of finding and preparing data.
-  The company visualises data in a map to help citizens find properties, schools, crime hotspots, local news and road safety.

**How open data is used**

-  Doorda collects different government datasets from the United Kingdom and visualises it on an online map that helps citizens better understand public data about their local area.
-  Doorda also consults firms on how to use open data.

**Description**

-  Doorda provides businesses with unique data within different categories, such as properties and health, and provides insights and recommendations on how to exploit the data.
