Parkopedia
Application

Re-use

URL	https://en.parkopedia.com

Quick facts

- Company: Parkopedia
- Sector: Transport
- Product / service: Application
- Type of data: Geodata, static Open Data of parking facilities, sensor data
- Origin: United Kingdom

Benefits

- Allows drivers to find the closest (available) parking space to their destination and tells them the cost of parking.
- Application offers a pre-booking service, which allows drivers to reserve parking online.

How Open Data is used

- Open Data such as static general data on parking facilities are combined with sensor data to alert people on parking availability.

Future Plans

- Continue to provide information on closest available parking spaces.
