Quick facts

-  Company: HDScores
-  Sector: Health
-  Product / service: Application
-  Type of data: Data on restaurant hygiene
-  Origin: United States of America

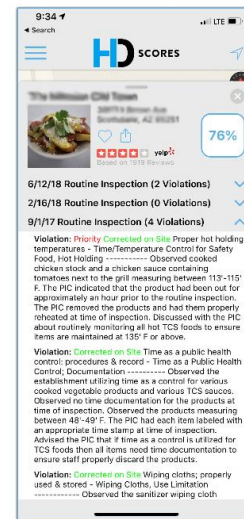

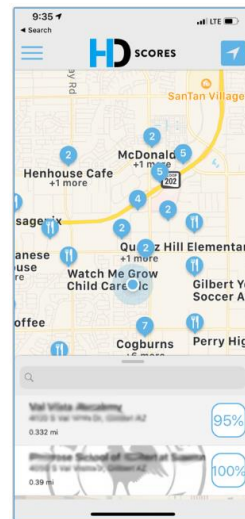

Description

With HDScores users can look for the calculated health inspection scores of restaurants and other food-serving establishments, such as schools, nurseries, hospitals, stadiums etc. The calculated score is between 0% and 100% (the closer to 100% the cleaner the place is) and includes the scores from all previous health inspections.

Benefits

-  With HDScores customers can find out about the health inspection assessment of a restaurant or food-serving establishment and thus find hygienic places to eat.
-  HDScores helps to minimise health issues caused by unhygienic conditions in restaurants.

How open data is used

-  HDScores has built a database of restaurants and food-serving establishments that covers 73% of the entire United States. This database is provided with reports from jurisdictional databases of 42 states on a weekly basis.
-  Using the established databased, HDScores are calculated and presented in combination with a map and further information.
