# PlantVillage Nuru
## Application

**URL** https://play.google.com/store/apps/details?id=plantvillage.nuru&hl=en

## Quick facts

- Company: PlantVillage Nuru
- Sector: Agriculture, Fisheries, Forestry & Foods
- Product / service: Application
- Type of data: Crop health data
- Origin: United States of America

## Description

PlantVillage Nuru is a publicly supported and developed application that helps farmers diagnose crops disease in the field without an internet connection. The application was developed at Penn State University in partnership with the International Institute of Tropical Agriculture and the United Nations Food and Agricultural Organisation. Plantvillage Nuru is the largest open access library of crop health knowledge in the world.

## Benefits

- PlantVillage Nuru can be used without internet connection.
- The application is free to download and is easy to use.

## How open data is used

The application collects databases of images from crop disease experts across the world. The database is continuously updated by experts in the field.
