### Quick facts

-  Company: iRail
-  Sector: Transportation
-  Product / service: Service
-  Type of data: Transportation
-  Origin: Belgium

### Benefits

-  Less time waste by allowing users to identify most efficient itinerary through Belgian railway stations.
-  Less car use by stimulating public transport in combination with other types of transportation.

### How Open Data is used

-  Official railway service and scheduling data is not legally required to be made available as Open Data. However, as a result of a student project this information is converted into Open Data.
-  iRail creates interfaces for developers who want to use transport data in Belgium.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
28	29	01	02	03	04	05
06	07	08	09	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	31	01	02
03	04	05	06	07	08	09

### Future plans

-  iRail is part of Open Knowledge Belgium, aiming to open up knowledge in Belgium through both a bottom up and community driven way, and through working together with governments and organisations.
-  At the moment, accessing the official data requires a contract with the Belgian railways. Further opening up data will yield increased benefits
