Quick facts
- Company: Transmetrics
- Sector: Transport
- Product / service: Service
- Type of data: Transport Data
- Origin: Bulgaria

Benefits
- Transmetrics solution provides cargo companies with an accurate demand forecast and network optimisation based on Big Data and predictive analytics. This limits the empty space within cargo vehicles.

How Open Data is used
- Transmetrics uses various types of Open Data for their analyses, e.g. infrastructural data, traffic information, road conditions, customs declarations.

Other information
- Since 2013 Transmetrics has grown from 4 co-founders to a team of 19 highly skilled part- and full-time employees, received many international awards, including Forbes Business Awards, and signed the contract with its first official customer in 2015. Currently, the team is working with several other world-known cargo companies.
