

URL <https://www.nic.cz/>

#### Quick facts

-  Company: CZ.NIC
-  Sector: Science & Technology
-  Product / service: Application
-  Type of data: Telecommunication data
-  Origin: Czech Republic

#### Benefits

-  The international project “Open crowdsourcing data related to the quality of service of high-speed Internet” aims to encourage the development of Open Data in the user’s measurement of high-speed Internet.

#### How Open Data is used

-  Mobile applications will be developed that allow end users to easily test the speed of their mobile Internet, as well as other related activities such as data analysis, publications and more.
-  Data will then be made available free of charge, as Open Data, to end users, companies and public institutions.

#### Other information

-  The international project “Open crowdsourcing data related to the quality of service of high-speed Internet” was launched in January 2017
