Quick facts

- Company: Ackee
- Sector: IT
- Product / service: Application
- Type of data: Public safety
- Origin: Czech Republic

Benefits

- This application lowers the risk of user of getting mugged or assaulted.
- Unlike crime maps it reports the situation in a given location at a given time.

How Open Data is used

- The risk rate is calculated from three data sources: data from ambulances, data from municipal police and data reported by users.
- Public data sets are filtered accordingly; only a selected type of incidents is taken into account. Single incidents can be reported as well by users, either via a prefilled option or just as a subjective feeling from a given location on a grade 1 to 5.

OHROŽENÍ 10:09

3,5

Other information

- It is a mobile application suitable for iOS
- It was developed during the Open Data Hackathon in Prague.
