Quick facts

- Company: Real Reality
- Sector: Real Estate/Housing
- Product / service: Application
- Type of data: Real Estate
- Origin: Czech Republic

Benefits

- Real Reality is a browser plugin that shows information about parking, air quality, noise pollution and transport services in the area where users are looking for a house or apartment.

How Open Data is used

- Real Reality combines multiple data sources (data sets on transport services, parking, air quality, noise pollution) to provide information for users looking for a house or apartment.

Other information

- The plugin appears as a little side panel to some real estate sites which shows you the quality of a certain location e.g.. commutation times, air pollution.
