Quick facts

- Company: Instats
- Sector: Science & Technology
- Product / service: Application
- Type of data: Other
- Origin: Estonia

Benefits

- Instats allows knowledge workers to discover statistics data and easily visualise it.
- It helps consulting companies, think tanks, citizen journalists, etc to easily use fact-based information.

How Open Data is used

- Users can browse through different data sets from Eurostat or the OECD available in the Instats data visualization engine.

Other information

- Instats is part of the Open Data Incubator for Europe

Find and visualize relevant and up-to-date statistical data

Eurostat (t2020_10) population
Employment rate by sex, age group 20-64 – %
The employment rate is calculated by dividing the number of persons aged 20 to 64 in employment by the total population of the same age group. The indicator is based on the EU Labour Force Survey. The survey covers the entire population living in private households and excludes those in collective households such as boarding houses, halls of residence and hospitals. Employed population consists of those persons who during the reference week did any work for pay or profit for at least one hour, or were not working but had jobs from which they were temporarily absent

Eurostat (t2020_50) population
to hit at least 20 million people out of the risk of poverty and social exclusion. This indicator corresponds to the sum of persons who are: at risk of poverty or severely materially deprived or living in households with very low work intensity. Persons are only counted once even if they are present in several sub-indicators. At risk-of-poverty are persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 % of the national median equivalised disposable income (after social transfers). Material deprivation covers indicators relating to economic strain and durables. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from

Eurostat (tag00054) agriculture
Crop output – basic and producer prices
Crop output is valued at basic prices. The basic price is defined as the price received by the producer, after deduction of all taxes on products but including all subsidies on products. The concept of output comprises sales, changes in stocks, and crop products used as animal feedingstuffs, for processing and own final use by the producers.
